02 ╱ Five Key Advantages of NSS Network Technology Co., Ltd.

Advantage 1
Nearly 10,000 Website Development Projects Completed

With a team of highly skilled web designers and e-commerce experts, we have completed nearly 10,000 website development projects and served 30,000 businesses since our establishment in 2000.

Advantage 2
One-Stop Service & Extensive Hosting Management Experience

We offer a complete one-stop solution, including: Domain registration, Website hosting & maintenance, SSL security, Website & software development, Digital marketing.
Additionally, all images we use are legally licensed, eliminating any copyright infringement risks for our clients.

Advantage 3   24/7 Support & Lifetime Warranty

Many web design companies shut down or fail to provide after-sales service, leaving clients stranded. At NSS, we provide 365-day, round-the-clock support and a lifetime warranty, ensuring long-term website security and stability.

Advantage 4   Full Access to Source Code for Maximum Control

Unlike some competitors who lock clients into proprietary systems, we provide full access to website source code and backend programs. This means you own your website completely and have the freedom to manage or transfer it as needed.

Comprehensive Website Performance Reports & Digital Marketing Services

Once your website is built, we provide detailed marketing analytics and reports to help you optimize performance, improve marketing strategies, and boost revenue.

NSS Network Technology vs. Other Competitors

04 / Online Business Opportunities

The era of e-commerce has arrived, and businesses must seize online opportunities to remain competitive. A well-designed website significantly enhances customer trust in your brand, serving as the digital storefront and often the first point of contact for potential clients. Effective visual and content design can improve search engine rankings, leading to increased traffic and revenue.

> Studies have shown that exceptional website design can boost performance by over 30% and allow for a 20% higher pricing margin compared to competitors.

Five Key Benefits of a Well-Designed Website

1. Enhancing Brand Image

A website serves as a digital storefront, representing your company's brand identity and products. Attractive design, user-friendly navigation, and professional content are crucial in shaping a strong corporate image and building customer trust.

2. Increasing Sales & Conversions

A website not only showcases products and services but also provides multiple ways to boost sales, such as shopping carts, LINE, Facebook fan pages, and influencer promotions. Combined with SEO strategies, it attracts potential customers and increases conversion rates.

3. Reducing Marketing Costs

Traditional advertising methods, such as flyers, billboards, and TV commercials, are costly and often fail to deliver immediate results. Digital marketing allows businesses to analyze visitor data in real-time, ensuring 24/7 automated sales operations with higher efficiency and lower costs.

4. Strengthening Customer Service

Features like email, contact forms, and live chat improve customer engagement and interaction. A website helps businesses gather valuable customer feedback, allowing them to enhance services and adjust future strategies.

5. Gaining a Competitive Edge

A website allows for instant updates on new products, promotions, and announcements, ensuring that your business reaches its target audience efficiently. With the rise of mobile browsing, a well-optimized website ensures no missed orders and a strong market presence right from the start.

05 ／ Template-Based Website Design

Template-Based Website Design is a method of creating websites using pre-designed templates as a foundation, with minimal modifications. This approach saves time, reduces costs, and minimizes technical complexity compared to building a website from scratch. It is ideal for businesses and individuals who need a website quickly, such as small to medium-sized enterprises (SMEs) or personal blogs.

Template-based website design is typically offered by designers or web service providers, allowing users to customize the template according to their needs. Users can add text, images, videos, and other content while maintaining a certain level of flexibility and creative freedom.

What is the difference between a Template-Based Website and a Custom Website?

Category	Template-Based Website	Custom Website
Production Cost	Lower	Higher
Production Time	3-4 weeks	2 months or more
Responsive RWD	Included	Included
Design Quality	Basic template design	High-quality custom design
Functionality	Limited to template features	Fully customizable
Design Flexibility	Cannot be customized	Fully customizable

Five Key Benefits of Website Design

- **Strengthening Customer Service**
  By integrating email support, feedback forms, and live chat services into the website, businesses can enhance communication with customers, demonstrating a commitment to customer satisfaction.

- **Enhancing Brand Image**
  A well-designed website reflects the company's brand identity. High-quality web design significantly improves brand perception and professionalism, leaving a strong first impression on consumers.

- **Reducing Marketing Costs**
  During the early stages of brand building, a well-structured website that effectively attracts and retains visitors can help reduce advertising expenses in the long run.

- **Increasing Sales Conversions**
  By showcasing products and services on the website and integrating shopping carts, LINE, Facebook fan pages, and influencer promotions, businesses can expand their sales channels and boost revenue.

- **Gaining a Competitive Edge**
  When launching new products or promotions, businesses can use their website for email newsletters, push notifications, and announcements, increasing visibility and capturing the target market ahead of competitors.

  Discounted Price: NT$5,000 (First Year Only)

Price: For professional inquiries, please contact our sales team.
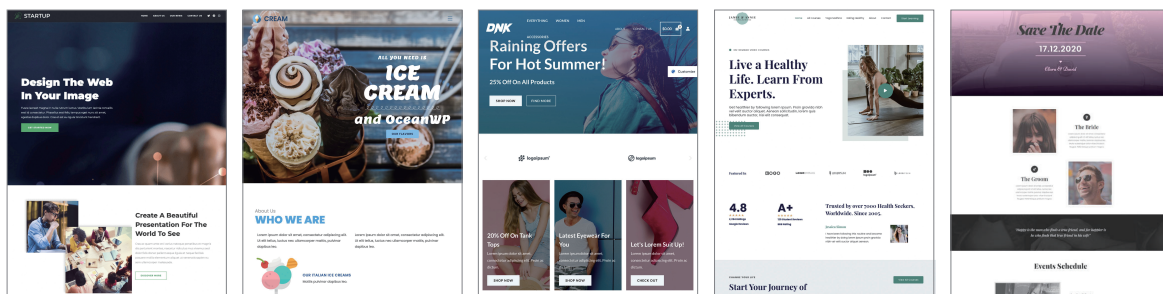

06 / One-Page Website Design

A One-Page Website, also known as a Single-Page Website, is a web design format where all content is displayed within a single webpage. This type of website utilizes various images, animations, and dynamic effects to effectively showcase a company's or individual's brand and style.

By presenting concise and clear text content in a streamlined layout, one-page websites maintain a clean, focused, and intuitive design, making information easier to understand and navigate.

One-page websites are widely used for: Thematic websites, Event pages, Marketing landing pages, Product shopping pages

They are an effective digital marketing strategy that enhances user engagement and conversion rates.

Developed using Android native programming languages.
Always updated to the latest Android version.
Optimized for Android Phones, Wearables, Tablets, and TVs.

Advantages of NSS Network Technology's Mobile App Development Services

Full Ownership & Open Source Code

All app source code is open to the client after project completion.
Clients retain full control over user data, membership databases, payment processing, and pricing strategies.
0% revenue sharing, ensuring no vendor lock-in or hidden charges in the future.

Expert Mobile App Development Team

Our team consists of highly skilled professionals, including: System Architects, Android Engineers, iOS Engineers, App UI Designers

Tailored App Solutions for Various Industries

We specialize in custom app development for a wide range of industries, including: Real Estate & Construction, Healthcare & Medical Services, Education & Tutoring, Entertainment & Gaming, Finance & Banking, Hospitality & Restaurants
We develop marketing-driven App features, such as gaming elements, sweepstakes, promotions, and event registration systems, ensuring a customized solution that aligns with your business needs.

7-Step Mobile App Development Process

Requirement Confirmation –
Define clients' needs, direction, and specifications.

Planning & Evaluation –
Identify target users, create initial concept, assess feasibility.

Contract Signing –
Client approves and signs the contract with initial payment.

UI/UX Design –
Create and confirm interface design (design approval payment).

Development –
Code implementation with regular client updates.

Testing & Debugging –
Check functionality, fix bugs, and retest.

Launch & Maintenance –
Final approval, app store submission, and warranty phase.

09 ／ Website Development Process

Step 1: Requirement Consultation

Discuss client needs using our standardized SOP process for planning.

Step 2: Quotation & Proposal

Provide a detailed website proposal and pricing based on the required functions.
Template-Based Websites – Priced according to standard specifications.
Custom Websites – Quoted based on development time and complexity.

Step 3: Contract Signing, Payment & Data Submission

Sign the official contract and agree on responsibilities.
Website development will start only after all necessary materials are provided.
Projects under NT$100,000 require full payment upfront.

Step 4: Design Confirmation & Development

Clients submit required materials via design request form
A project group chat (LINE) will be created for discussions.
A test site is provided, along with two homepage design options within one week.
After homepage approval, inner page designs begin (includes 3 revision rounds).
Additional revisions after 3 rounds will incur extra charges.

Step 5: Final Payment, Training & Website Deployment
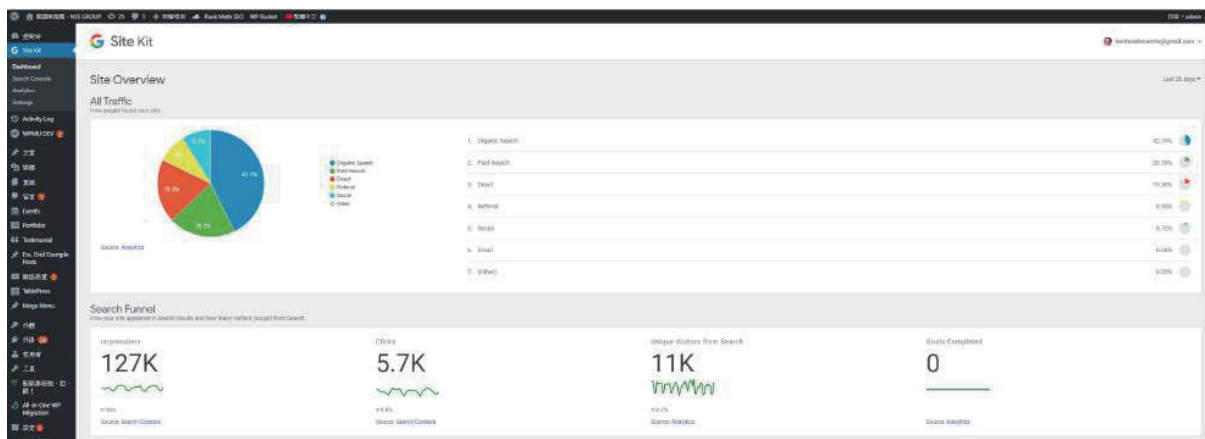

After final approval, we will:
1. Deploy the website on the live server & install SSL certificate (if purchased).
2. Provide backend training, including 1-hour phone support and a recorded video tutorial.
3. Deliver website source files via email.
4. Set up SEO basics, Google Analytics, and online customer support system.
5. Conduct final testing before launching the website.

Step 6: Ongoing Maintenance & Annual Renewals

Website development does not include ongoing maintenance.
Clients can choose to manage the site independently or opt for a maintenance contract.
Annual fees for hosting & SSL renewal apply.
